## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 5-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Fournier (3,818,911).

Fournier discloses a cleansing swab, as disclosed in column 3, lines 58-65, comprising an inflexible applicator shaft 22 and a moisture absorbent end piece 17 positioned over the first end of the shaft 22, as shown in figure 6.

With respect to claims 2 and 3, the end piece 17 comprises a dome-shaped tip and three projecting disc-like portions, as shown in figure 6.

With respect to claims 5 and 6, the second end of the shaft 22 forms a handle extending at an obtuse angle of approximately 170 degrees, as shown in figure 10.

With respect to claim 7, the second end of the shaft 22 is offset at an angle from the longitudinal axis, as shown in figure 10.

With respect to claim 8, the end piece 17 comprises a dome-shaped tip and at least one projecting disc-like portions, as shown in figure 6.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fournier (3,818,911) in view of Yoon (5,439,457).

Fournier discloses all aspects of the claimed invention with the exception of the disc-like portions having diameters that increase in size toward the tip.

Yoon discloses a cleansing swab having disc-like portions of different diameters, the diameters increasing in size toward the tip of the swab, as shown in figure 18. Increasing the diameter towards the tip of the swab provides the swab with advantageous insertion and decreased leakage, as disclosed in column 9, lines 46-52.

It would therefore be obvious to one of ordinary skill in the art at the time of invention to increase the diameter of the disc-like portions of Fournier toward the tip of the swab, as taught by Yoon, to provide the swab with advantageous insertion and decreased leakage.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent 5,715,559 discloses a cleaning swab

Art Unit: 3761

comprising disc-like portions having various diameters. U.S. Patent 6,789,971 discloses a cleaning swab having an offset handle.
